

## POSTDOCTORAL RESEARCHER

REF.:PDR\_DG\_62

The Josep Carreras Leukaemia Research Institute (IJC) is a non-profit research institute based in Barcelona and dedicated to advancing our understanding about leukaemia and related disorders, in partnership with the University of Barcelona and University Autònoma of Barcelona. The IJC has laboratories in four clinical campuses: i) Clinic Hospital, ii) Sant Pau Hospital and iii) Germans Trias i Pujol Hospital and iv) Dr. Josep Trueta University Hospital. IJC serves as a collaborative hub for basic investigators and physicians to work together on fundamental biological and clinical aspects of leukaemia. The IJC offers an excellent work environment built around a multi-disciplinary fusion of ideas and state-of-the-art facilities.

The Josep Carreras Leukaemia Research Institute – Girona, needs to incorporate a Postdoctoral Researcher in the Hematology Service.

### Research Description

The **ICO Girona Hematology Department** is the reference unit for the health region of the province of Girona, caring for 850.000 inhabitants.

We are a Consolidated Research Group according to the evaluation made by the Generalitat of Catalonia SGR2017 call. The research objectives of the group are related to the study of biological, clinical, and epidemiological aspects of hematological diseases, by carrying out translational research projects focused on finding prognostic factors or treatment response predictors. To date we have been specially focused on immune response after allogeneic hematopoietic transplantation, acute myeloid leukemia and multiple myeloma.

We are also participating in clinical trials for the evaluation of new treatment strategies in hematological malignancies.

Information regarding the Group Leader, composition of the research team, lines of research of the group and competitive funding can be found here: <https://icsgirona.cat/ca/contingut/hospital/840>

### What we need

The applicant should show an excellent scientific record and interest in the following topics: molecular and cellular biology of leukemia, lymphoma, myeloproliferative disorders, myelodysplastic syndromes, multiple myeloma or immunology/immunotherapy. Apart from outstanding scientific output, candidates must have experience in the application of competitive proposals as principal investigators and should be able to coordinate the research team together with the Group Leader, to

develop their own research projects and to support ongoing studies performed by other investigators within the group. A PhD in life sciences is a must have.

## What we offer

- A Postdoctoral Research position starting in July 2022.
- Incorporation in a highly collaborative team.
- An exciting and innovative research project.
- Full-time contract.
- Three-year contract with the possibility of being extended.

## How to apply

To apply for this opportunity, please send your resume and a cover letter and (incl. the contact details of two referees) to [jobs@carrerasresearch.org](mailto:jobs@carrerasresearch.org) including the reference **REF: PDR\_DG\_62**.

## Deadline for Applications

Please submit your application by June 30th, 2022.

## Who we are?

Our mission is to carry out research into the basic, epidemiological, preventive, clinical and translational aspects of leukaemia and other hematologic malignancies.

The vision of the Josep Carreras Leukaemia Research Institute is that research will identify new therapeutic targets and enable us to develop more precise and less aggressive treatments. We aspire to understand the origin and development of leukaemia and other malignant haematological pathologies in order to be able to prevent them. We will work for a future in which all leukaemias will be curable.

For further information, please, visit our webpage: <http://www.carrerasresearch.org/en> and the Josep Carreras non-profit organization: <https://www.fcarreras.org/en>

HR EXCELLENCE IN RESEARCH

The European Commission awarded the IJC the HR Excellence seal in July 2019. The IJC continues to work to maintain its policies in line with the Charter and Code principles.

The HRS4R has the main objective of ensuring that research centers of excellence implement and respect the requirements of the European Charter for Researchers and the Code of Conduct for hiring researchers (from here on referred to as the Charter and Code) within their human resources policies. This EC initiative aims to promote training, professional development, and mobility for all European scientists. The IJC supports these values and principles, which will not only serve to strengthen its internal policies but will actively stimulate excellent research and firmly situate the organization as an institution with a stimulating working environment that favors the development of its scientists.
